

# Saving passwords in Outlook Express

If you wish to have Outlook Express remember your password (so you don't need to type it in each time you check your e-mail), please follow the instructions below.

1. Launch Outlook Express and click on the Tools button followed by the Accounts button
2. Click on the Mail tab then highlight the mail account you want to save the password in
3. Click on the Properties button
4. Next, click on the Server tab, then click the Remember Password button and enter the password for your e-mail account
5. Click on the Apply button and then click OK
