

A partnership project of Evertek & TCA

Rural Hartley - We're Bringing You FIBER Internet!

April, 2023

Dear TCA customer,

We're writing with very good news. As you may know, Evertek & The Community Agency (TCA) is building a fiber Internet network to the rural customers of Hartley. It will deliver unlimited and ultra-fast Internet and phone services. We would love the opportunity to serve you when the project is complete, so please read below about next steps you can take today.

This project is a partnership between Evertek and TCA. We applied for and received funding for part of this project from the State of Iowa Broadband Grant program.

The **first and most important step you can take now** is to complete the online Permission to Bury form. You may complete the form online (using the link below) or use the paper form included with this letter.

- There is no cost to you for us to bring you fiber if you let us know before construction starts.
- Please complete the Permission to Bury form that can be found at www.evertek.net/hartley
- Completing the form doesn't obligate you to take service, but we know that most will want fiber Internet.
- If you don't complete the Permission to Bury form at this time and want fiber services later, there will be a fee of at least \$1,500 to bring fiber to your home.
- A product pricing sheet & the Permission to Bury form are included with the letter, but they may also be found on our website at www.evertek.net/hartley

Recently our engineering partner has been in the area mapping locations and finalizing construction plans. With luck construction could begin during the fall of 2023, but we will wait to announce construction/project timelines until after the construction contract is awarded.

Thanks for giving us the chance to serve you with fiber Internet. You'll be hearing from us again soon, but until then please visit www.evertek.net/hartley to review the info there, and complete the Permission to Bury form.

Sincerely,

The Evertek & TCA Team
